Use Up/Down Arrow keys to increase or decrease volume.

90 BPM hardcore rap, heavy boom bap drum beat, deep sub bass, dry spoken vocal, aggressive male rap delivery, rhythmic scratching, dark urban atmosphere, authentic hip hop, purely spoken word, zero melodic singing

\[Spoken Verse 1\]

The sun goes down. Shadows fall.

Hear the echoes. Through the wall.

Carried weight. I couldn't hold.

Summer heat. Winter cold.

\[Hard Hook\]

FIRE. BURNING DEEP INSIDE.

Nowhere to run. Nowhere to hide.

BREAK THE CHAINS. BREAKING THROUGH.

Yeah. Walking out to something new.

\[Fast Rap Verse 2\]

Heavy rain. Bitter wind.

Can't forget. The places I've been.

City lights. Open sky.

Keep on moving. Till I die.

\[Hard Hook\]

FIRE. BURNING DEEP INSIDE.

Nowhere to run. Nowhere to hide.

BREAK THE CHAINS. BREAKING THROUGH.

Yeah. Walking out to something new.

\[Beat Drop\]

Time is ticking. Clock spins around.

Look to the sky. Tied to the ground.

HEAR MY VOICE. CALLING OUT.

TEARING IT DOWN. REMOVING DOUBT.

\[Instrumental Scratch Break\]

\[Hard Hook\]

FIRE. BURNING DEEP INSIDE.

Nowhere to run. Nowhere to hide.

BREAK THE CHAINS. BREAKING THROUGH.

Yeah. Walking out to something new.

\[Acapella Outro\]

Out in the night. Catch the spark.

Leave a mark. In the dark.

BREAK THE CHAINS. BREAKING THROUGH.

Walking out. Something new.

\[End\]

Use Up/Down Arrow keys to increase or decrease volume.

90 BPM spoken word hip hop, slam poetry over heavy boom bap, aggressive spoken delivery, strictly rhythmic talking, raw underground cypher, zero melody, no singing, dry vocal, gritty urban beat

\[Spoken Word Intro\]

Yeah. Look.

Sun's dropping down... watch the shadows just fall.

I'm hearing every single echo bleeding right through this wall.

\\[Verse 1\\]

Listen, I've been carrying this weight, man, stuff I couldn't even hold.

Through the boiling summer heat. Through the freezing winter cold.

It's heavy.

Yeah.

\\[Rhythmic Hook\\]

Fire. It's burning deep down inside me.

Got nowhere left to run. Got nowhere to hide, see?

I'm breaking these chains, yeah, I'm finally breaking through.

Stepping out the front door. Walking into something new.

\\[Verse 2\\]

Heavy rain falling down, feeling that bitter wind blowing.

Can't forget the past places I've been, but I know where I'm going.

City lights blinding me. Open sky above my head.

I'm gonna keep on moving forward till the day that I'm dead.

Look.

\\[Rhythmic Hook\\]

Fire. It's burning deep down inside me.

Got nowhere left to run. Got nowhere to hide, see?

I'm breaking these chains, yeah, I'm finally breaking through.

Stepping out the front door. Walking into something new.

\\[Beat Drop\\]

Time keeps ticking on. Clock just spins around.

Looking up at the sky but my feet are chained to the ground.

Hear my voice now. I'm calling it out loud.

Tearing the whole thing down. Removing every single doubt.

\\[Outro Cypher\\]

Out in the night. Catch the spark.

Leave my mark out here in the dark.

Yeah.

Breaking the chains. Breaking through.

Something new.

\[End\]

Text-to-Video Prompt Structure

How to structure prompts that work.

Text Version (Continuous Block)

\[Visuals\] Neo-Noir, Cinematic 4k, 1950s Film Style. A grizzled detective sits behind a cluttered desk with a glass ashtray in a dim office. The room is filled with a thick, static atmospheric haze, but there are no visible cigarettes or smoke plumes. He leans forward, holding a photograph so the viewer sees ONLY the blank, white back of the photo paper. He lowers the photo, leans back in his creaking leather chair with a look of exhausted triumph, and speaks directly to the air. Medium Shot, Center Framed, Slow Dolly In, Slight Low Angle. Low Key, Chiaroscuro, Volumetric Lighting (God Rays), Hard Shadows. 50mm Anamorphic, f/2.8, Film Grain.

\[Dialogue/Audio\] "I told you I'd find the loose thread." (Spoken in a dry, gritty, monotone voice with exhausted relief). Audio should be silence, office room tone, hum of ventilation, and creaking chair only. NO MUSIC.

ElevenLabs Audio Tags

Voice and emotion tags for AI speech synthesis.

Also known as Prompting Tags or Speech Control Tags, with the release of the ElevenLabs v3 model, these are known as Audio Tags.

There isn't a strict, finite dictionary because the AI model is trained to interpret natural language cues. You can often type any descriptive word or action in brackets, and the model will attempt to perform it. However, ElevenLabs has documented primary tags that the system reliably recognizes.

Voiceover with Audio Tags

![ElevenLabs audio tags list.](https://aiinjection.com/wp-content/uploads/2026/04/ElevenLabs-Audio-Tags-List.webp "ElevenLabs Audio Tags List")

Voiceover without Audio Tags

1. Emotional Tone

These dictate the mood and feeling of the speaker's delivery.

****Tags**:** [happy], [excited], [sad], [angry], [nervous], [frustrated], [tired], [curious], [mischievously], [serious], [confident], [ironic], [cheerful], [sorrowful]

2. Reactions & Non-Verbal Sounds

These insert human-like sounds and unscripted natural reactions into the audio.

****Tags**:** [laughs], [laughing], [laughs harder], [starts laughing], [wheezing], [sighs], [exhales], [crying], [clears throat], [gulps], [gasp], [breathes], [snorts]

3. Delivery Style & Volume

These adjust the energy, volume, and specific performance style of the read.

****Tags**:** [whispers], [whispering], [shouts], [shouting], [quietly], [loudly], [flatly], [monotone], [with expression], [sarcastic], [dramatic], [matter-of-fact], [whiny], [explaining]

4. Pacing & Timing

These tags manipulate the rhythm, speed, and flow of the speech.

****Tags**:** [pause], [long pause], [rushed], [slow], [slows down], [deliberate], [rapid-fire], [stammers], [drawn out], [repeats], [timidly], [continues after a beat]

5. Emphasis & Dialogue Mechanics

These are used to shape sentence stress or manage multi-character conversational dynamics.

****Tags**:** [emphasized], [stress on next word], [understated], [interrupting], [overlapping]

6. Character Archetypes & Accents

You can direct the AI to take on a specific persona or accent mid-sentence without changing the base voice model.

****Tags**:** [pirate voice], [French accent], [British accent], [Australian accent], [Southern US accent], [evil scientist voice], [childlike tone], [fantasy narrator], [sci-fi AI voice], [classic film noir]

How to use them effectively:

Tags are case-insensitive ([SIGH] works the same as [sigh]). You can also stack them together to create layered performances. For example, writing [nervous][whispering] I think someone is out there. will combine both the emotion and the delivery style. The effect of a tag generally persists until a new tag is introduced or the paragraph ends.
